PROFILE

.NET Full Stack Developer with 3+ years building and modernizing business-critical applications in C#/.NET, Blazor and Angular. Currently developing real-time manufacturing dashboards and data pipelines on .NET 10 in an industrial environment, with strong expertise in SQL Server performance tuning, CI/CD (Azure DevOps, GitLab) and Docker deployments on Linux. Comfortable with non-technical stakeholders, taking ownership from analysis to production.

PROFESSIONAL EXPERIENCE

.NET Developer — Reborn (plastics manufacturing group) March 2026 – Present · Casablanca

- Design and develop a **real-time Andon manufacturing dashboard** in Blazor Server / .NET 10, aggregating live machine data (MES) and SAP PM maintenance data across production divisions and workshops.
- Diagnose and resolve severe SQL Server performance incidents — enforcing SARGable queries, index strategy and execution-plan analysis; **one fix eliminated billions of unnecessary logical reads**.
- Lead the migration of legacy **VB.NET WebForms applications to Blazor Server**, preserving existing database contracts and business behaviour.
- Build **.NET ETL services** synchronizing external billing APIs with SQL Server, including resilience policies (circuit breakers, retries) and scheduled execution on Linux.
- Presented an **AI-based ticket triage proof of concept** (LLM classification, human-in-the-loop routing) to the IT steering committee.
- Own CI/CD pipelines on Azure DevOps and Docker deployments to Ubuntu servers; xUnit test suites (Moq, FluentAssertions) and technical documentation.

.NET Developer, Business Applications & IT Systems — Nexpublica July 2024 – February 2026 · Casablanca

- Maintained and evolved business-critical applications built on C#/.NET (Framework & Core) and **Dynamics CRM**, ensuring operational continuity for end users.
- Contributed to information-system redesign — process re-engineering, flow optimization, integrations — delivering new features alongside functional teams.
- Integrated Microsoft applications with existing systems (CRM / APIs) and **automated data flows** for reliability and performance.
- Set up **CI/CD pipelines** (GitLab, Azure DevOps) and dockerized applications for repeatable deployments; technical documentation and secure-coding practices.

EARLIER EXPERIENCE

.NET / Angular Developer — INETUM, Casablanca Apr – Jun 2024

Full Stack Web Developer (.NET) — Yulcom Technologies, Rabat Dec 2023 – Mar 2024

.NET Developer, Enterprise Applications — Exakis Nelite (Magellan Partners), Casablanca Feb – Aug 2023

Data Analyst — Sobrus, Temara Jul – Sep 2022

TECHNICAL SKILLS

Languages & Frameworks

C#, .NET 6–10 (Core & Framework), ASP.NET Core Web API, Blazor Server, Angular, VB.NET (legacy), Python (FastAPI)

DevOps & Tools

Azure DevOps (Boards, Repos, Pipelines), GitLab CI/CD, Docker, Git, Linux (Ubuntu), xUnit / Moq / FluentAssertions

Databases

SQL Server (T-SQL, stored procedures, query optimization, execution plans, indexing), PostgreSQL, Entity Framework, Dapper

Integration & Architecture

REST APIs, ERP/CRM integration (Dynamics CRM, SAP data), ETL pipelines, Clean Architecture, Agile / Scrum

EDUCATION

Master's Degree (M2), Computer Science & Information Systems —
Maroc Ynov Campus, 2021–2023

Bachelor's Degree, Computer Science — Web & Mobile Development — IMBT, 2020–2021

Specialized Technician Diploma, Computer Science — IMBT, 2018–2020

CERTIFICATIONS & LANGUAGES

Angular Certification — Google

French — native / full professional proficiency

English — professional working proficiency (B2)
